

# Excite Visual Systems™

## ExciteDental System Order Form

- The ExciteDental system displays the unique story about your practice to all patients in the waiting room. It is a unique high-tech digital display system of your personalized visual dental messages presented through an Internet connection to a large plasma wide-screen monitor in reception areas. This exclusive system allows you to educate patients and tell your story in an interesting and compelling manner. Personalized means the story is about you and your practice, not generic or about someone else.
- Uniquely personalized to your practice and consumer oriented, these visual dental messages fulfill patients' needs for more education, leading to greater case acceptance and create an impact that no outdated CDs, DVDs, tapes or broadcast television can match. No other medium has as much power to capture 100% of patients.
- The personalized visual educational messages include: before & after images of your dentistry cases, testimonials to the quality of your work, information about the elective procedures you offer like whitening, veneers, implants, porcelain crowns, sleep dentistry...and more. This system can also integrate your website, brochures, yellow pages, customer testimonials, on-hold messaging, and any additional education you want your patients and staff to know.
- Industry experts recommend investing a minimum of 4-6% (up to 5%-10%) of the practice gross revenue on educational marketing. Internal patient education is proven to be 6 times less expensive and yet dollar for dollar more effective. On a million dollar practice, the Excite Dental system costs about 0.3% – affordable and yet delivers high impact and retention to all patients.
- The ExciteDental system is completely turn-key – no extra staff, freelancers or consultants are necessary. You supply the electricity and the Internet connection – we do the rest. Once installed, limited to no staff interaction is required.
- ExciteDental was featured at the national ASDA conference, the Star of the North MDA meeting, and at the national AACD conference. In beta tests with cosmetic dentists and other medical practitioners, results show increased patient awareness and satisfaction, and improved revenue from elective procedures. One additional case can pay for the system.

## Educational & Personalized Message Segments

- ExciteDental creates a digital library of practice-specific educational messages oriented to cosmetic dentistry practices that you may choose from. These educational messages include information about your practice (requires no sound) and before & after pictures (your before & after pictures or from our library). See the attached Educational Message form for the selection.
- Patients may not always be viewing your website. To alleviate this problem, as an option we can display information from your website and place it on the reception room screen, and conversely, the Educational Messages playing in the reception area can be added to your website.
- Personalized Message Segments vary in length, but average from 20 to 45 seconds each, and we recommend between 4 to 9 minutes of total messages. Proven marketing standards suggest delivering the message within this timeframe to capture the greatest impact. The key importance is to capture the attention of your patients and provide the visual messages in memorable short segments.

# Excite Visual Systems™

## System Management

- Requires no staff or user intervention. The annual System Management Fee includes the remotely monitored daily management and electronic delivery of the Personalized Message Segments to your screen in the reception area through an Internet connection. Also included is 24/7 monitoring and remote technical support, eliminating your need to procure hardware, software, and designer skills to operate the system – this saves you time and money as we amortize costs over many clients.
- After installation, if an onsite visit is required there may be per incident technical support fees that apply.

## System Hardware & Software

- The ExciteDental system includes a 42" standard definition plasma monitor, table top, or wall mounted. As an option, additional commercial grade plasma and LCD flat-screen monitors are available upon request.
- Monitors powered by direct connection to commercial grade high performance digital PC players with proprietary integrated software, and connect to the Internet via a wireless configuration (if applicable). This software enables turn-key operation allowing you to focus on your practice and patients.
- Hardware and software system is entirely scalable for adding more flat panel monitors, digital PC players, and software without needing to replace equipment.

## Warranty, Software Upgrades

- System software includes upgrades therefore minimizing outmoded technology surprises. These upgrade costs are included in the annually renewable System Management Fee.
- Monitor screens and the digital PC player have OEM manufacturer-backed 1 year warranties. As an option, extended warranties may be purchased.

## Pricing: System Hardware, Software & Installation

- |                          |  |           |
|--------------------------|--|-----------|

\*1/2 down at order, balance upon installation. Applicable sales tax will be added.

# Excite Visual Systems™

## Installation Requirements

- The requirements we'll need provided to install our system are: 1) electrical power near the monitor location (this may need to be installed by an electrician), 2) an Internet connection (preferably high speed like DSL or cable), and 3) mounting location for the digital display screen and player.
- One-time access through any internet firewalls to set up our remote managing system software.
- Installation will be scheduled within 15 – 25 days, at a time convenient to your practice.

## Summary

- Some dentists believe in doing their own marketing. However, promoting a practice with non-professional marketing is the equivalent of advertising a practice using photos of people who have fixed their own teeth.
- This professional system emphasizes to your patients the level of expertise they can expect, and that you have the latest technologies and are offering the best in dental care.
- Your staff won't have to extend additional effort, and you'll save time, aggravation, and money by having our experts work with you.
- Calculated hourly on a normal work-week basis, the total cost to purchase, have us create Personalized Visual Messages, send through the Internet, and manage the system averages the price of a cup of coffee. One new case pays for the entire system. This is very affordable.
- Presently, most patients are unaware of the procedures a doctor has available, like a restaurant without a menu. This system is the menu for patients to learn what is available.
- Our ExciteDental system displays your services and educates your patients in the appropriate consumer-oriented approach, and with current high technology of the Internet and personalized visual messages. CD/DVD based patient education systems are too "clinical" and generic for patients, not personalized to your practice, and may actually diminish patient interest.
- Thank you for the opportunity to provide this proposal, and we look forward to a long-term relationship.
