Increase Elective Case Production with ExciteDental

*Showcase your quality
with dynamic digital media*

A small brochure sitting on an end table — if it ever gets read — can't convey the quality of your services or your practice the way that an ExciteDental digital system can.

With ExciteDental, customized, animated messages about your practice, photographs of your work, even pages from your Web site will play on a large flatscreen monitor in your reception area to give you a captivating and artistic way to educate and inform your patients. An ExciteDental system can improve:

- **Patient's Dental IQ** - educate your patients about all that can be done
- **Case Presentation & Acceptance** - help patients understand & say 'yes'
- **Production** - better awareness of your services & quality build confidence
- **Image** - convey that cutting-edge dentistry is performed there every day

Utilizing software from 3M and being fully warranted assures you that an ExciteDental system is of only the highest quality. And, being completely turn-key, ExciteDental makes it easy for your messages to come alive! Call us or visit our Web site for more information:
